Mohamed El Alami

Computer Science Student — Systematic Trading Research & AI Tooling

Shenzhen, China elalamimeded@gmail.com github.com/elalamiimed hitszcs.com

SUMMARY

Moroccan computer science student at Harbin Institute of Technology, Shenzhen (B.Eng. 2024–2028). Builds systematic trading research tooling — market-structure analysis, entry/exit logic, risk rules and backtesting — and local-first AI agent software. Founded HITSZCS (53★) and directs General Affairs for HITSZ's international student club. Seeking a quantitative research or trading internship.

EDUCATION

Harbin Institute of Technology, Shenzhen — 2024 – 2028 (expected)

B.Eng. Computer Science & Technology

Coursework: Data Structures & Algorithms, Computer Networks, Programming Design, Computational Mathematics. Class monitor 2024–2025; invited HITSZ orientation-day speaker.

Qingdao Agricultural University — 2023 – 2024

Chinese Language Program — merit certificate (优秀证书)

EXPERIENCE & LEADERSHIP

HSIYC — HITSZ International Youth Club — 2026 – present

Director, General Affairs Department (综合事务部 部长)

- Lead a 23-person department in HITSZ's first formally recognised international student organisation (167 members, five departments): administration, records, minutes, logistics and finance.
- Ran department recruitment — 127 applicants scored by eight interviewers, 41 direct selections, 13 confirmed into General Affairs.
- Authored the 25-slide General Meeting II governance deck and presented the Fall 2026 recap (16 completed activities across six areas).

HITSZCS — open-source student library — Oct 2024 – present

Founder & Maintainer · 53★, 9 forks, 16 contributors · hitszcs.com

- Founded an open library of course notes, past papers and study material for HITSZ computer-science students; 563 commits so far.
- Designed and shipped the public site; ran GitHub workshops for students new to version control.
- Invited to tell the HITSZCS story in the HITSZ orientation address to an incoming cohort.

Hack Hive Hackathon 01 — "Study Buddy" — 2026

Organiser & platform builder · 71-hour event

- Designed the format for two-person teams with automatic solo-entrant matching; built the event site and the PHP team-matching backend.
- Wrote the brief, rules and judging criteria; judged six submissions on a front-end / features / UX rubric.

HITSZ — Class 2, Computer Science — 2024 – 2025

Class Monitor (elected)

- Chaired class committee meetings; ran student-ID distribution, attendance and information collection.
- Voted by classmates to represent them; escalated cohort-wide concerns about a mid-term teaching method to the committee.

Independent quantitative research

Ongoing · paper only

Studies retail market structure across FX, gold, equities, ETFs and crypto, and builds the tooling around it: pattern discovery, signal-based rules, entry/exit logic, risk controls and backtesting.

SELECTED PROJECTS

HITSZCS

Python · 53★

Open study-material library and site for HITSZ CS students — 53 stars, 9 forks, 563 commits from 16 contributors; live at hitszcs.com.

MISO — Gold Macro Engine

Python · private

Macro signal engine for XAUUSD: COT positioning, intermarket, volatility, ETF-flow, COMEX and USD-liquidity engines feeding weekly and daily long/short decisions. 82k lines, 486 files, 37 test files.

CryptoBot

Python · research

Empirical study of newly discovered Solana tokens: 41,470 labelled launches, 45,000+ on-chain tapes and a launch-window classifier. Paper only — no wallet, no signing.

Session-Sweep Engine

Python · Backtrader

Modular, event-driven backtester for an XAUUSD session-liquidity-sweep strategy: 1-minute sweep detection, candlestick confirmation, ATR stops and OCO brackets on real gold data.

Agentica

Python · LLM

Bilingual EN/中文 article writer: 27-question intake form → publication-ready draft, pre-checked against reviewers' rejection patterns.

SKILLS

LANGUAGES

Python (primary), TypeScript / JavaScript, SQL / PL-SQL, Java, C++ (coursework), HTML / CSS

TOOLS

Flask, FastAPI, Git / GitHub, LLM APIs & agents, Oracle APEX, Linux, Docker

DOMAINS

Trading-systems research, backtesting & risk rules, AI agents, machine learning (coursework), computer networks

CREDENTIALS

Direct Funded — Certified Trader, Phase 1

Mar 2025

Passed Phase 1 of a funded-trader evaluation programme (Funding Program Evaluation-10000).

FundingPips — Certificate of Achievement

May 2025

Passed Phase 1 and completed the Evaluation Stage of a proprietary-trading funding programme.

LANGUAGES & INTERESTS
